Guest001: While filling DS-160 form, I got stuck at "Additional Point of Contact Information". I have to list at least two contacts in my country of residence who can verify the information that I have provided on the application but I can't list my family and relatives. People other than my family and relatives won't be able to verify my personal information. Can you tell me who exactly can I list? Any example? Also, In "Family" section of DS-160 form, while listing immediate relatives in the United States, do we need to list married siblings or just non-married ones?
